6 Nov 2016 Mass Effect: Andromeda - Galaxy Map Fix If you've been using the in-game galaxy map, you'll be pleased to learn that Andromeda's developer has released a fix that corrects one of the map's major issues. If you're also an online player, this news will be particularly comforting, as you can finally travel around the world and meet other players. The patch addresses one of the game's major issues—the lack of populated space in the galaxy map. 29 Nov 2016 Oct 30, 2016 The original statement is this: 2) I'm a PC and I used the cracked version I guess my anti virus program has deleted the crack. The map which includes all the maps, is now functioning as expected. I've used the crack, I still get the map and I can travel, just not do anything important. Nov 19, 2016 November 19, 2016 I bought the game in December, but it's been sitting on my desk for a few months. I have not played it because I do not have a galaxy map. My friend bought a game for me on steam, and I opened it to find the game I bought missing, except I could not travel and the credits did not count. I attempted to download a copy from the website, and was told that I could only download the map that I have. I would love to play the full game and complete it, but I feel as though I have been duped by a company that does not support their product, or the people that bought it. I will not buy any games from them, or even play them if I can help it. I will not be supporting this company or the rest of the industry that practices this. If any of you that bought this game from Steam, and you're having the same problem as me, please let me know, or if you don't mind email me, I would like to hear your side of the story. Nov 28, 2016 Nov 28, 2016 I just had the same issue as you, I bought the game on the 28th from steam and every other day was downloading a new map,
