About: Jan 15, 2019 After an update of TomTom to NavCore 8.843 this week, new versions of games of the Carminat TomTom navigation game broke the game. The navcore file is updated to fix it, however, if you upgrade again with the same TomTom Home SD Card, the navcore won't work. We're working on a solution to prevent this, but in the meantime, I've prepared a navcore file that should work. Please note that the navcore file may contain bugs that need to be fixed.
