## Everybody Edits Digbot Download vanfawn

It's been a while since I've heard from FloddyFosh, though. Thank you for your efforts. Lil'DewGreen 09-15-2009, 10:25 PM I just found out that FloddyFosh is back! All the world of Minecraft is visible! He has a new Digbot that can dig Nether portals, though I don't know how to use it or why it needs to be finished. Lol. Sorry. I just don't understand a lot of things. You know how the Portal-thing was different in the Nether, huh? Like people said, it wouldn't kill you, but I think that's not true. Anyway, people said that the portal was a Nether portal, but the Portal-thing is a Nether portal. And you can go from the Nether to the end of the world. And there's stuff there. FloddyFosh 09-15-2009, 10:43 PM Oh, well, its pretty irrelevant as to what the heck the Nether is. Basically its an alternate dimension. Anyways, yes, it can be used to get to the end of the world and there is stuff there, some of which is only a bit a bit different from earth, but anythings better than being cut up by a redstone/brick. Getting back to digbot, its basically a pick and shovel. You can use it in a bunch of different ways. In fact, if you look on the Digbot, there are 4 different commands: digger: Used to fill your inventory with dirt. sapper: Digs dirt, however, creates a hole where you place it.
