Japanese Patent Laid-Open No. 2001-68963 (Patent Document 1) describes a technique of forming a buried wiring of an inner layer of a semiconductor integrated circuit. The technique described in Patent Document 1 uses a damascene process for forming wiring in an interlayer insulating film. Specifically, a trench is formed in the interlayer insulating film. A metal layer is buried in the trench. Thereby, the wiring layer is embedded in the interlayer insulating film. Then, the metal layer is removed
