mod? Have I got the right idea here? I want to make a 3d non-game for "crafter" and I was thinking about implementing something like this. I would hope that I'm heading in the right direction, but I don't want to go completely down the wrong road.

A: Go right. You want to use PBR texture mapping for your game. Italy's jobless rate fell in December to a record low of 9.2%, official data showed on Wednesday. A rise in employment, however, was offset by an increase in the number of people not in the labour market. The jobless rate dropped from 10.2% in November. The number of Italians in work increased to 49.7 million in 2012, up 2.2 million over the previous year, according to the national statistics office Istat. It marks the highest figure since Italy's national statistics institute started recording employment figures on a regular basis in 1957. In 2012, however, the rate of growth was slower than in 2011 (3.4%) and the previous year (3.5%). The jobless rate has fallen in almost all regions in the past two years, particularly in the central and south-eastern parts of the country. Rome's jobless rate was 10.4% in 2012, down from 17% in 2010. In the south-east the rate fell to 10.6% in 2012, compared to 11.6% the year before. Meanwhile, the national unemployment rate of 10.2% in December was nearly a tenth lower than in June. The jobless rate has been declining over the past four years, with the exception of a rise in 2011. The number of employed Italians also increased by 1.1 million between November and December to 49.7 million. And with the exception of the region of Basilicata, all the regions of the country saw an increase in employment. The number of unemployed people rose slightly to 11.5 million, up 0.2 million.
