A: There are several things to consider when using one solution over another. You are looking for a specific number of points Are you happy with having a grid, or are you happy for every point to be a dot? Are you happy with a map size of A4, or are you happy with a map size of A2? The former is GridSource, the latter is StreetMapSource. You can mix and match, but generally, a dot-based solution is superior to a grid-based solution. That said, you can also consider basing your solution on Bing Maps. Here is a comparison between a dot-based solution and Bing Maps (using Bing Maps, you can find it on the map interface, the bottom right side, and choose a Bing Map). I've downloaded the dot-based one because I was having problems with the grid-based version. Download the DotMapSource.zip and unzip, then run the DotMapSource.bat (I was running Windows XP at the time, so I couldn't run the.exe directly) and follow the instructions. When you do this, you are given 3 options: Click to download additional data. Download zipped data to this folder. Browse the web. Personally, I chose to browse the web, and it was easy, but feel free to try the other options if you like. I've had both kinds of solutions be available on my computer, and then I found out about Bing Maps. Since Bing Maps has millions of points of interest (POIs), it's ideal for downloading. There are no dots. For example, you can see I have the road map to Detroit in Michigan. Here is a Bing Maps option on your computer. I am not aware of any way to download a street map for offline use. It would be easy to convert the streets into dots, and would still be pretty reliable, but the level of detail would be on a map of the city, not a map of the world. There are no dots on the world map. The hypothalamic nuclei involved in the detection of obestatin (ghrelin) by kisspeptin neurons. Ghrelin, a peptide mainly synthesized in the stomach, exerts its main action in the central nervous system. It is mostly involved in the regulation of food intake but also in the control of reproductive
