Each account has its own server that runs on its own dedicated box. 2. Document Security Features: Password Protection PDF Secure will automatically password protect your pdf files using 256-bit or 512-bit AES (depending on the feature you use). PDF Secure will password protect all the file contents (text, graphics and images) and all the object contents (text, graphics and images). Password Protection is a mandatory feature for any pdf application. PDF Secure can be configured to ask the user to enter a password prior to opening or saving the pdf file and then automatically re-enter the password whenever the file is opened or saved. Double Password Protection PDF Secure allows the user to enter a second password, allowing the files to be protected by a password for a second time. The second password is optional, but must be entered to unprotect the file. If you need to encrypt a pdf for multiple recipients, it is recommended that the second password be different from the first password. Encryption PDF Secure is a popular choice for encryption as it is available as a server solution that does not require you to download the client software and, as a server solution, it is also not vulnerable to viruses or malware. PDF Secure can be configured to encrypt pdf files using 256-bit or 512-bit AES (depending on the feature you use). PDF Secure's primary encryption is AES256 (AES-256). (AES-256). PDF Secure's Secondary encryption is AES128 (AES-128). (AES-128). PDF Secure's alternative method of encryption is the S/MIME Standard. Digital Signatures PDF Secure has two encryption methods. These are not mutually exclusive. Both are available. (TXT) for documents which are digitally signed by a certificate. for documents which are digitally signed by a certificate. PDF Secure's primary standard for digital signing is the S/MIME Standard. (HASH) for documents which are not digitally signed. for documents which are not digitally signed. PDF Secure also supports the PDF-A standard. (SAF) for archives which are not digitally signed, this is only available in the PDF-A standard. (PDF) for archives which are digitally signed.
