KashBox Payment Processing Software Crack Serial Number Full Torrent Free [Mac/Win] 2022 [New]

Authorize.net has been selected by Mercury Payment Systems to provide merchant account services for KashBox PC-based credit card processing software. Mercury announced the selection of Authorize.net this week after having conducted a thorough review of other credit card processing providers. Mercury said that they are very pleased with the level of support that Authorize.net provides for Mercury. With the KashBox software, merchants can process their credit card transactions through Authorize.net's secure gateway. "We are excited to have Mercury as our new co-processor," said Jason Yerrid, President of KashBox. "We have worked very closely with Mercury to make sure that KashBox meets their stringent merchant requirements and their high level of customer service." Mercury said they are interested in the KashBox software because it offers a significant alternative to the traditional credit card terminal. "We're very impressed with the software," said Steve Flora, Mercury's vice president of sales for Eastern Canada. "The technology gives merchants the ability to accept credit cards in a variety of ways, from the traditional fixed PIN terminal, through the online panel, to the wireless magnetic swipe device, and many others. Merchants using the KashBox software also have a choice of fast-processing rates through merchant rate programs or low-volume, lower rates through Mercury's merchant alliances. This was a very important consideration for us." In addition to Mercury's merchant agreements, Authorize.net offers merchants low-cost merchant account services designed specifically to meet the needs of small business. "Authorize.net has been a great partner for Mercury and we are excited to expand their merchant account program with KashBox," said Doug Eaker, Mercury's president of merchant services. "We are very impressed with KashBox and feel that the unique features and functionality will help merchants cut processing costs and improve their service to their patrons. Through Mercury's merchant alliances, Authorize.net will be able to offer merchants extremely competitive credit card processing rates. When combined with a wireless swipe device, the features and functionality of KashBox will have a dramatic impact on the everyday business experiences for merchants across Canada. Mercury looks forward to supporting KashBox as their direct merchant." Mercury said that they have no plans to offer KashBox software in any other market. Mercury will continue to partner with Authorize.net in the US and other markets, but KashBox will be available only in Canada through Mercury's Canadian partners. Mercury will also provide KashBox with additional software for use in their merchant alliances.

KashBox Payment Processing Software Crack Activation Key Free

☒ The KashBox database is built on a LINUX operating system with MySQL as the database management system. ☒ The payment API is provided by the payment gateway Mercury Payment Systems. ☒ KashBox is a licensed product available in two forms, the Limited Edition, which comes with the software and the Plus Edition which includes support and a license to the Mercury Payment Systems API. ☒ KashBox is offered in two packages. One is the free KashBox LE offering which is limited to one computer and is free for all merchants. The Plus Version is available only through Authorized Dealers. The MSRP for the Plus Edition is \$195.00. ☒ KashBox is easy to set up and use and the software allows for complete end of day settlement. ☒ KashBox LE, free to use, allows merchants to accept payments for a single cash register or multiple pay stations. ☒ KashBox Plus, the paystations or the computer, can run the full KashBox software or just the KashBox Plus API which integrates directly with merchant accounts from Mercury Payment Systems. ☒ KashBox Plus is available only through Authorized Dealers. Key features of KashBox Plus Version: ☒ Merchants can select any of the Mercury Payment Systems APIs including Check Verification or Guarantee (CVC) for processing credit cards; ATM/Debit card processing via the ACH debit API; and Gift Card processing via the Gift Card API. ☒ Merchants who have a KashBox Plus Edition license have access to an email notification service when a payment is made to their account via their merchant account. ☒ Merchants who have a KashBox Plus Edition license have access to an email notification service when a payment is received via their merchant account. ☒ Merchants who have a Plus Edition license can upload a list of Approved Stores to KashBox. This allows KashBox to send the listed merchant's information to the payment gateway as a reference. ☒ KashBox Plus provides the same features as the KashBox Plus Edition however, the Plus Edition is more robust and supports Windows Server 2008 and Exchange Server 2007/2003 R2. ☒ Merchants can upgrade to the Plus Edition for an upgrade fee. When to use KashBox: ☒ KashBox is designed for SMBs (Small and Medium Business) and individual merchants. ☒ KashBox can be set up and run in multiple locations 09e8f5149f
