Its purpose is to generate macros for applications in an easy way, so that you do not have to switch to different applications or navigate to and from the program manually. You can use the **KEYMACRO** to generate macros with a keyboard shortcut that can be executed using the hotkeys of the target application. To add a macro to the list, open the Macros tab, click on **New...** and then on **Add**. You will see that a new field is automatically added to the list of macros. Name your macro in the Name field and then drag the file of the target program to the field of the Key. Once

you are done, the newly created macro is saved and can be executed in the target application by pressing the hotkey of your choice. You can also delete a macro from the list by clicking on its entry and then on Remove. KEYMACRO Lite

Portable IncrediMail Message Extractor is a lightweight tool that can extract messages from an IncrediMail database file, so that you can archive and keep them safe. Its simple options can be configured even by novice users. As the name says, this is a portable tool, hence there is no setup pack available. In other words, you can drop the program files

anywhere on the hard drive and run the executable file directly. Another method to run this tool on any computer is by saving it to a USB flash drive or similar storage unit. Moreover, you can keep Portable IncrediMail Message Extractor in your pocket wherever you go. The most important aspect is that Windows Registry is not updated with entries, and the hard drive is not left with unnecessary files after removing the app. Portable IncrediMail Message Extractor is wrapped in a plain interface with an intuitive layout, where you can use the file

browser to specify the source file and the tree view for the target directory. The filenames can be picked between numbering and field. The latter option refers to subject, receive time, sent time, recipient, sender or user-defined. In addition, you can select an available database for an IncrediMail message entity and export data to the CSV format, switch to a different language for the interface, customize the appearance, as well as write a pattern for the filenames. Portable IncrediMail Message Extractor does not take a long time to finish an extraction job, and it needs only a

small quantity of system resources. No error notifications have been shown in our tests and the app did not hang or crash. Thanks to its intuitive layout and overall simplicity, rookies should have no problem in working with Portable IncrediMail Message Extractor.
