But the tale is no game. It's a real story, and one that, like so many of us, Frasco had to tell. When his doctors told him he had just eight weeks to live because he was suffering from amyotrophic lateral sclerosis, Frasco chose to extend his life with a new kind of therapy: via the Internet. Frasco, 49, an electronic engineer living in Santa Ana, wrote to Dr. Leonard Lopate, a psychiatrist at Columbia University, asking for advice on how to deal with the reality of his imminent death. Lopate responded with what he calls a paradox: "You can't die. You can't escape the logic of your position." "As I thought about this, I began to realize that I wanted to make the experience of dying my subject matter," Frasco said. To do that, he launched a Web site on August 16, 1999, to chronicle his journey, and to allow himself to live in the moment, instead of focusing on the future and how he might
