I've submitted a paper to the conference and I need to prepare the submitted version of it to be included in the official proceedings. I've been using LaTeX for the conference paper and I'd like to publish my code to GitHub. Is that possible? How? A: The "official proceedings" link you're referring to is a link to the conference website. They will distribute the official proceedings link to authors so you can submit your papers to the proceedings. So, in theory, it should be possible to put your code on GitHub (after you submit your paper), but in practice I've never seen them do it. A: Yes, it's possible to submit your source code to GitHub. Just add the following lines to the bottom of the file: \GitHub \GitHub As long as your comments and author line are correct, GitHub should be able to automatically track the changes.
