In 1983, AutoCAD Download With Full Crack was released for IBM PC compatible personal computers, with the MS-DOS, DR-DOS, and Microsoft Windows interfaces. (The newer Windows XP interface is an overlay of Windows 3.1.) On the Macintosh platform, AutoCAD and its predecessor, AutoCAD 64, were developed by Autodesk. (AutoCAD 64 became AutoCAD AutoCAD R14 in 1999. AutoCAD R14 is available on Macintosh platforms. The previous AutoCAD for Mac was AutoCAD 64.) Figure 1: The AutoCAD symbol There are several versions of AutoCAD available. The newest version is AutoCAD R2018, which was released in May 2017. The following lists the different versions of AutoCAD: AutoCAD, a desktop and mobile app, was first released in 1982 and was available for the Apple II, IBM PC (MS-DOS and DR-DOS), Macintosh, and Microsoft Windows platforms. AutoCAD 2000, a desktop and mobile app, was released in 1990 and was available for the IBM PC (MS-DOS and DR-DOS), Macintosh, and Microsoft Windows platforms. AutoCAD R2000, a desktop and mobile app, was released in 1994 and was available for the IBM PC (MS-DOS and DR-DOS), Macintosh, and Microsoft Windows platforms. AutoCAD R2001, a desktop and mobile app, was released in 1995 and was available for the IBM PC (MS-DOS and DR-DOS), Macintosh, and Microsoft Windows platforms. AutoCAD R2002, a desktop and mobile app, was released in 1997 and was available for the IBM PC (MS-DOS and DR-DOS), Macintosh, and Microsoft Windows platforms. AutoCAD 2003, a desktop and mobile app, was released in 1998 and was available for the IBM PC (MS-DOS and DR-DOS), Macintosh, and Microsoft Windows platforms. AutoCAD 2004, a desktop and mobile app, was released in 1999 and was available for the IBM PC (MS-DOS and DR-DOS), Macintosh, and Microsoft Windows platforms. AutoCAD 2008, a desktop and mobile app, was released in 2001 and was available for the IBM PC (MS-DOS and DR-DOS), Macintosh, and Microsoft Windows platforms. CAD is a trademark of Autodesk, Inc. History AutoCAD, initially part of the main AutoCAD line of software, was first released in 1989. Since then, major updates have been released every two years. The product is designed to deliver a professional solution for architecture, mechanical and electrical engineers, engineers working in civil engineering, architectural designers, landscape architects and urban designers. In 2005, AutoCAD was re-engineered from the ground up, which was a major departure from the product being the industry-standard. This version of the product is expected to be released in 2007. AutoCAD LE AutoCAD LE (Lite Edition) is designed to run on lower-power hardware and to function as an ideal introduction to the full version of AutoCAD and to AutoCAD LT. Automation Autodesk currently offers three programming languages for the Autodesk line of software: Visual Basic for Application (VBA), Visual LISP (VLISP) and AutoLISP. AutoLISP has been discontinued. AutoLISP is a LISP-like language with its own dialect. It is suitable for a broad spectrum of tasks, including standalone development, plug-in development and script automation. AutoLISP is based on the C++ class library from Autodesk Exchange Apps, allowing developers to easily implement plug-in functionality using their favorite programming language. It is also possible to make add-ons using AutoLISP for AutoCAD and its higher level add-on products. The following languages have been included with AutoCAD in the past: Visual Basic for Application (VBA): Introduced in AutoCAD 2000. VBA is compatible with Microsoft Office automation, particularly Microsoft Word automation. It is a procedural programming language. There are several limitations and a steep learning curve, and its portability and performance are not as good as AutoLISP. Visual LISP (VLISP): Introduced in AutoCAD 2002. The first language with full graphical user interface support and an embedded scripting engine. It is a functional programming language, which is arguably more powerful than AutoLISP, but less easy to learn than procedural languages. Visual Basic for Application VBScript is a scripting language designed to run in conjunction with the Microsoft Office scripting engine, which is used to automate Excel and Microsoft Word.
