The woman was found in a house in the northern part of Paris. Cyril Altmeyer/PA Images via AP It said two people were being sought on suspicion of aggravated murder and that the investigation was in its preliminary stages. The incident has sent shockwaves in the French capital, with many people asking whether mental health problems prompted the young woman to take her own life. Paris police were called to the scene at 9:30 a.m. (0830 GMT). French media reported that a neighbor told them the woman had been suffering from depression and was "extremely fragile," and that she was found by an acquaintance in the courtyard of the home. The Paris prosecutor's office said the woman was found dead on the ground floor of the house. "There were no signs of struggle, there was no risk of finding other bodies, the doors of the house were closed and locked," police spokeswoman Agnes Thibault-Lecuire told AFP. Residents of the area said they heard screams and saw the woman's body on the ground. "The woman jumped from a fifth floor window," a local shopkeeper said. "It's a large, tall window with no security shutter." The neighbor who spoke to media said the woman was suffering from depression and had asked to be placed in a psychiatric ward, but was told the mental health service was unable to take her. The neighbor said the woman had a dog and had recently gotten divorced. Neighbors told French media that the woman had mental health problems. Alarm over suicide Many people were shocked by the news. ## What's New in the AutoCAD?

There are many types of markups you can create, and you can now incorporate all of them in one easy way: As a PDF or Microsoft Word document, an image or video, or from a barcode, QR code, URL, or WAC file. You can even import existing drawings from DWG format that you want to make changes to. AutoCAD has many commands for sending feedback and comments, including the MARKUP command that can be used to send simple text comments or draw other drawings. With the MARKUP command, you can have your drawing import feedback from a printed paper or PDF (printing from AutoCAD); from a video; from a barcode, QR code, or WAC file; or from an image or a file with a URL, a path to an AutoCAD file, or a direct link to another drawing. Drawings loaded from WAC files cannot import markups, and drawings loaded from DWG files cannot import markups that are in a vector format (like SVG). Up to four markups can be imported at a time, and you can edit each markup in a new drawing in one place, side-by-side with the original drawing. Automatic Import: When you open a drawing, AutoCAD creates a new drawing, and you can perform edits on the new drawing. When you save the drawing, you can also save the new drawing with the changes. If you know which drawing you want to load, you can just load that file, and AutoCAD will load that drawing. You can also open all of your drawings with a single command. You can export drawings created in the newer drawing environment to DWG, DXF, DWF, or PDF format to recreate drawings from older releases. Drag and drop: You can drag and drop text and objects into your drawing. Dragging objects from other drawings creates a parent-child relationship. You can drag and drop groups and subgroups. The drag preview feature allows you to preview what will be dropped, and you can drag any objects in the preview, including groups and subgroups. Double-click to select: You can double-click an object to select it. When you double-click an object, the points of that object are automatically selected. Use the Selection snap option to automatically snap to objects when you
