- Memory usage - Memory leaks - Graphical display - XML export option

About Resource Meter: Resource Meter is a small package tool that will determine and monitor currently accessible SYSTEM, GDI and USER resources. This utility will help win32 programmers watch for memory leaks during the API

calls in their programs. This Resource Meter works and indicates same as standard Resource Meter in Windows supplyment, but refreshes data more often (once at 50 milliseconds). Resource Meter Description: - Memory usage - Memory leaks - Graphical display - XML export option You don't want to read it, you just want to get rid of it? Ewwwww. Try apt-get

autoremove Ok, nice idea. Can you stop making windows programs that don't even work correctly? Just because someone doesn't like your app is no reason to put it on the front page of the first post. If you don't like something, why are you arguing about it? Do you have any better ideas of what to do? There are lots of programs that aren't in the software repositories that are

just as good, if not better. I'd say that people who liked your app have at least been thinking about it and trying to install it. You don't want to read it, you just want to get rid of it? Ewwwww. Try apt-get autoremove Ok, nice idea. Can you stop making windows programs that don't even work correctly? Just because someone doesn't like your app is no reason to put it on the

front page of the first post. If you don't like something, why are you arguing about it? Do you have any better ideas of what to do? There are lots of programs that aren't in the software repositories that are just as good, if not better. I'd say that people who liked your app have at least been thinking about it and trying to install it. Ok, nice idea. Can you stop making windows programs that

don't even work correctly? Just because someone doesn't like your app is no reason to put it on the front page of the first post. If you don't like something, why are you arguing about it? Resource Meter is a small package tool that will determine and monitor currently accessible SYSTEM, GDI and USER resources. This utility will help win32 programmers watch for memory leaks during the API calls in their programs. This Resource Meter works and indicates same as standard Resource Meter in Windows supplyment, but refreshes data

more often (once at 50 milliseconds). So, Resource Meter with refresh rate of 50 ms. will give better picture.

Input Data for Resource Meter:

- 1) Path of a Windows resource Dll or a standard EXE in question
- 2) Perform sample, range of resources that is being monitored
- 3) Output Path of Resource Dll (to be created)
- 4) Optional Output data in text file (in CSV format)

Note: 1) You

can run this Resource Meter for a specific Windows resource or for a group of resources, but if you run Resource Meter for a group of resources, please separate them with a comma(',') or a semicolon(';'). 2) Please use 64 bit version of Resource Meter, as 32 bit version contains some bug in calculation. 3) Some resources, like Memory, are displayed in percents, while other resource,

like.NET Memory, is displayed in MB. 4) To reset all data, you can use `ClearAllRoms()` method. To clear all Resource Meter data, you can use `ClearAllResources()`. If you have any questions, please feel free to contact us. Example: ``
`string strCommand = "C:\\Desktop\\RmTest\\x64\\rm.exe ";`
`strCommand += "c:\\Windows\\System32\\rundll32.exe";`
`strCommand += " " + "\\app.ex`

```
e,64,0x008000,0x008000,0x008000,0x008000"; strCommand += " " + strFilePath + "" /u /p "" + strUserName + """; strCommand += " " + strPassword + """; strCommand += " /r"; using (Process proc = new Process()) { proc.StartInfo.FileName = strCommand; proc.StartInfo.WindowStyle = ProcessWindowStyle.Hidden; proc.StartInfo.Arguments = "";
```

proc.StartInfo.UseShellExec

System Requirements For Resource Meter:

Windows 7, Vista, XP, 2000
SP3 4GB RAM AMD Radeon
HD 6570 or HD 5870 1GB
VRAM 1 Core Processor
1024x768 DS2 Output
Playback 1360x768 DVD
Speed 256x Recommend
Windows 7, Vista, XP, 2000
SP3 4GB RAM AMD Radeon
HD 6570 or HD 5870 1GB
VRAM 1 Core

Processor1024x768DS2 Output Playback1360x768DVD Speed 256x Destination Texture Size
