Today, the main software program type that runs on Apple computers is macOS, though a number of applications such as AutoCAD, AutoCAD LT, AutoCAD Map 3D, and AutoCAD Architecture are available for Windows. AutoCAD Map 3D and AutoCAD Architecture are both visual programming applications that can be used to design databases, structures, and buildings. These programs use the same type of visual representations as AutoCAD. Although there is also a community-created FreeCAD 3D CAD application for Linux, Mac, and Windows, these apps are not included in this guide.

Lamb Of God drummer Chris Adler was left fighting for his life after he was hospitalized last week with internal bleeding. Adler was injured while on tour in Brazil when he was punched in the head while on stage, just days after celebrating his 30th birthday. His bandmates, frontman Randy Blythe and guitarist Mark Morton, were also injured in the incident, and were also treated in hospital. Blythe posted a photo of himself with the message: "Praying for my brother @chrisadler in a hospital in Rio de Janeiro. If you know how to help his recovery, please pass along the info." A post on Lamb Of God's official Facebook page says that Adler was taken to a hospital after they were done playing, and that he was there for "about 5 hours." They then update that he's "coming out of his sedation now, and he has some light internal bleeding." The band also revealed that Adler was "advised not to have more surgery" and are "doing what we can to monitor and hope he gets better." Blythe posted a more recent photo of his bandmate and said: "Stay strong my brother, and I'm here with you." The band will headline the Soundwave festival in January, just after Adler's birthday. There is a cost to every request that you make of Enron Net Works. I understand that you would like the RQ Gateway and BTS user groups to have access to the ENW test environment. However, there are a few restrictions on your request. First, as a test environment, the test environment is a high utilization environment. The cost for that environment is \$25,000 per month. In addition, to minimize the disruption to the ENW users, it would not be practical to decommission the test environment in order to create a new test environment. The test
