Download

Cybergenic Shade is a sandboxing solution that allows you to protect your computer from virus infection and similar threats. The program allows you to safely browse the Internet, as well as block any untrusted processes and applications running on your computer. Cybergenic Shade is simple to use and can run in the background. Protect important data from leaking online Cybergenic Shade can help you protect your system from malware infection while browsing the Internet, by filtering various actions, by running all the processes through a sandbox-type of environment. It provides protection for the system files, registry entries and other data, safe viewing of webpages, as well as email accessing. Moreover, it can isolate history, cookies and temporary Internet files, in a secure environment while browsing the Web. It can also control the Internet downloads, by running them through the isolated environment, thus keeping

your system from malicious components. Running programs through the sandbox Cybergenic Shade provides you with a powerful, safety filter, a sandbox for running the selected applications. All you need to do is add the processes to the sandbox list by dragging and dropping the application in Cybergenic Shade's interface. Once added to the isolated environment, each time you open an application it runs virtualized, thus being protected from malicious processes. Each program from the isolated environment can be opened in the usual way, since Shade does not block the access to it, only untrusted actions/tasks. This environment is isolated from the system, therefore preventing any threat from reaching it. Simple, yet reliable anti-virus protection Cybergenic Shade works as a simple anti-virus application, since it blocks any attempted changes on the system, made by the monitored applications. Moreover, it can isolate the files created / modified by the sandboxed applications, into special, so-called virtual folders. Therefore, the program can ensure that no threat

can reach the system files or the registry. System Requirements: Cybergenic Shade is not able to run on: – Windows XP – Windows 7 – Windows 8 – Windows 8.1 – Windows 10 – Mac Mac Osx Lion 10.7.x Note: Any anti-virus software may slow your computer down. Your computer can be slowed down by any antivirus software, so it is important to choose a reliable software that won't slow down your computer. We recommend that you install and use Malwarebytes Anti-Mal
