The Ultimate Photo Editor Reviews-Program evaluation The software application is composed of four basic components, which you are able to access through a menu bar at the top of the screen. The first one is the "Image" section, which includes among other things: import/export, image treatment, export/print options, and image backup. "Effects" is about enhancing an image's appearance and its brightness, contrast and color; it features all sorts of filters, which can change an image's overall appearance, as well as color tone, opacity, and color reproduction. Finally, there is the "Layers" tab, which enables you to make adjustments to an image's brightness, contrast and color, as well as make changes to its color and layer opacity.
