Pocket Mouse Crack + Free [April-2022]

Once a connection has been established, the iOS device can be used to control PC mouse cursor and keyboard, zoom in and out and change screen resolution. With Pocket Mouse Crack Free Download, the PC can run the desktop application in a similar fashion to using a mouse and keyboard. With Pocket Mouse, the computer can be controlled via an iOS device such as a iPhone, iPad or iPod Touch, over an ad-hoc Wi-Fi connection, without the need for a PC with an internet connection or a mouse and keyboard. Once Pocket Mouse for iOS is connected to the target computer, it can be used to control: Mouse cursor: tap a hotspot to drag the cursor. Lock and unlock the screen: tap on the screen to show an image of a lock, press the screen to lock it and touch again to unlock it. Zoom in and out: double tap to zoom in and out. Resize the desktop display: pinch to zoom in or out. You will no longer have to type in the address of the remote computer, you can use the iOS device as a remote control. Pocket Mouse Features: Gesture control: Customizable gestures can be configured. Shake left or right to zoom in or out. Double-tap to zoom in. Double-tap to zoom out. Shake to scroll the page. Drag to move the page. Pinch to zoom. Settings: It is possible to configure Pocket Mouse for iOS to either use or not use gestures. The client can be configured to remember last settings used for each target computer. Target computers can be added to a "favorite" list and they will be automatically loaded on the target computer. With the feature "Possibility to send keystrokes", the client can be configured to send any keystroke it wishes on the target computer. Possibility to change hotspot names. Ability to re-connect to a computer without asking for a password. Ability to view hostname, IP address and connection status. Transferring files: With the target computer connected, any file can be transferred from the iOS device to the computer. With the target computer disconnected, the user can use the iOS device to send files from the computer to the iOS device. Target computers can be configured to not display the file
