AutoCAD Architecture and Civil 3D. There are other new features that are making it easier to work on both 2D and 3D models with a single application. AutoCAD 2016 You can use a single CAD application to create 2D drawings, 3D models, and 2D drawings that are viewable from all 3D perspectives. The most important advantage is that you can work with 2D and 3D models without switching between 2D and 3D views. In addition, you can easily create, edit, and save the drawings using the correct CAD format. The advantages of AutoCAD are: You can create both 2D and 3D drawings. You can open drawings made using AutoCAD in 2016 without any problems. You can combine 2D and 3D CAD files within the same application, AutoCAD does not require the use of hardware. It is also compatible with both 2D and 3D drawing. AutoCAD Architecture Autodesk has introduced a new architectural CAD application named AutoCAD Architecture. This application is a plug-in for AutoCAD in which you can create models and renderings that use the 2D design or 3D visuals with a single application. The benefit is that you can use the same software to create 2D drawings and the visualizations. You can use the same software to design a 2D architectural drawing, 2D model, 3D model, rendering, and 3D visualization. This enables you to use the same software for 2D and 3D and the architectural CAD files

when they upgrade to AutoCAD LT 2014 or AutoCAD LT 2015. In addition, AutoCAD LT and ACADBS customers can download free Access databases of AutoCAD drawings from the AutoCAD Exchange site. Customization AutoCAD can be customized with many different approaches to meet a large variety of needs. The customization mechanism is built into the AutoLISP and VBAs and is used to automate tasks and to customize the user interface. The customization facilities are part of the object code of AutoCAD; however, they are also available as separate software. The customization products can be downloaded from the application store for free, or licensed via a subscription from Autodesk to have the customization capability in the application. AutoCAD can be customized through user and product customization tools such as the Configuration Manager, and through configuration profiles. The customization system can also be used to set up user access to project files, and to set up the drawing exchange format. Xrefs Xrefs enable users to reference other AutoCAD drawings or external files, or to check for conflicts with their own AutoCAD files. Xrefs are marked with the "@" symbol in the dimension text, and the "@" symbol can be used to reference a dimension in the target drawing. Xrefs can be used to extract views, data and geometries from a drawing for use with non-AutoCAD applications, and to refer to other applications in the drawing. Xrefs can be found in dimension text, attribute tables, tables, and many other drawing objects. Xrefs are used to check for conflicts with the current drawing, and they are also used to validate a drawing against model geometry. Common commands The Common commands include all the commands that are available in the system toolbar, such as plotting, dimensioning, annotation, and text. These commands are used for basic drawing functions. Access In 2009, Autodesk announced the release of the AutoCAD Application Programming Interface (API), 5b5f913d15
