Video key feature The most interesting and professional feature of the Video Key is that it takes, based on an input video file, a frame image from that video and then paste it into another video file. After that, it generates a separate video from the first video, which can be used in your editing applications. Its main advantages are: 1. You have the possibility to use any video clip as a video key. 2. You can create any number of

---

key frames in a video file. 3. It automatically saves your created key frames into a separate video file. 4. You can import key frames into any video editor. 5. You can set the key frame time interval. 6. You can assign keyboard shortcuts to save or import key frames. Features: 1. Frame by frame video extraction from a video 2. Video editor with intuitive interface 3. Import any number of key frames into a video 4. Automatic save of key frames into separate video files 5. Time interval setting 6. Assign keyboard shortcuts to key frame

---

creation/import and saving 7. Import key frames into any video editor. 8. Ability to export key frames from a separate video to any other video editing software. Installation details: 1. Download the ZIP file. 2. Run it to install the program and run the program.

KEYMACRO is a video key maker application that can extract key frames from any video file and put them into a new video file. With this application you can add frames from a video into any video file or insert a specific frame from the first video file to any other video file. It can use any

---

video as input. It will start from the first frame of the first video. The video key maker can save the key frames in.TIF or.MPG format. You can select and set the key frame time. You can also set the size of the key frame and the speed of it. It can also add a text with any font and size into a selected frame. You can set the keyboard shortcut for creating or importing key frames and for exporting key frames. KEYMACRO is a unique program that can add frames into a video file or paste a frame from one video file into another.

---

KEYMACRO is a video key maker that supports most video formats. You can import key frames from a video into any video editing software and you can also export key frames from any video into another video editing 77a5ca646e

PhotoFunia offers a variety of useful functions to help you enhance your images. Its functions include automatic image corrections, adding visual effects, photo manipulations, photo transitions, photo montages, lightbox, watermarking, adjusting images' color, adding text and many others. - Auto Image Correction PhotoFunia provides a variety of automatic image corrections. You can correct image brightness and contrast, fix uneven exposure, remove

---

unwanted objects, remove red eye, flip, crop or resize your images. - Adding Visual Effects There is a large variety of visual effects available, such as perspective, shadow, edge, transparent, change color, black and white, sepia and others. You can apply different effects to your images by simply clicking on them. - Photo Manipulations PhotoFunia provides a wide range of photo manipulations, including rotation, photo montage, panorama, lightbox and photo transitions. - Photo Transitions You can add and edit photo transitions to

---

your images. You can select from several transition effects such as fade, wipe, spin, cross fade and others. - Watermarking PhotoFunia allows you to watermark your images with text, time, date, logo or URL. - Lightbox PhotoFunia provides you with a handy lightbox feature, which makes your images more appealing and attractive. - Color Adjustments The Color Adjustment panel allows you to adjust colors, saturation, hue, brightness and contrast. - Adding Text PhotoFunia allows you to add text to your images. You can change font, typeface, style

---
