Syntax Error while loading YAML ---- - hosts: osp.example.org become: yes tags: - playbook The error is that I think the variable "host" is read twice. I need it to be read when reading the ansible host inventory file. How can I solve this? Thank you EDIT: Having checked the sources of ansible-inventory I don't see why would I have any double variable. To be even more precise, here is the place where the variable is read twice
