You are spending so much time in searching and accessing all your Emails. And on all these long searches, there comes a time when your hard drive is filled with the data of years-old emails and you're not able to

---

find it back to your system. This happens mostly when your Documents are moved from different systems. But you can never recover and recover your lost data, it becomes totally Performace Testing temporary. So what to do in this situation? One common task that has to be done is, splitting your large sized PST file into smaller, manageable sized files and reorganizing them into one file. This split procedure should be

---

done carefully and gradually to avoid splitting the data which has not been saved properly. PCVITA, a renowned name in merging and splitting MS Outlook PST, has yet again developed a tool to help you out in performing these actions with great ease. The exclusive tool is called PCVITA Cracked PST Magic With Keygen Preview the Splitting or Merging PST File Contents tool. Here are some of the main features, which will

---

help you in doing the splitting & merging effortlessly: It will move all the emails of the selected account to a newly created file as well as emails of all the other selected email accounts to another newly created file. This is pretty cool because it saves you time and provides easy access to all the data at the same time. It will also update the mail id of the selected account to the new file or destination file. The size of

---

the destination file will automatically adjust itself to the size of the source file, as per your demands. This tool provides backup facility to the new file which you are creating. So, in case you need to restore the data, then you can use the backup file as well. In case, you would like to merge another large sized PST file with the current one, then the tool will move all the emails to a newly created file and update the mail

---

id of the mailboxes to the newly created file or destination file. It works on both the 32-bit as well as on the 64-bit systems. It also provides all the options on the computer environment (system setup, processing limits etc.) so that you can give it full control while working with the large sized PST files.
