Biologi ja Pries Egzamina Knyga Pdf Free Download...The present invention relates to a method of regenerating a catalyst used for purifying exhaust gas from an automobile engine or the like. In a combustion device used in an automobile engine or the like, the exhaust gas from the combustion device contains hazardous materials such as hydrocarbons and carbon monoxide. When these hazardous materials are contained in the exhaust gas, they undergo combustion, thereby becoming heat sources. As a result, the harmful matters are discharged into the atmosphere without being purified. In order to prevent this problem, a catalyst is generally employed in the exhaust gas purification system of an automobile engine, and the combustion of the hazardous materials is made possible by purifying the exhaust gas with the catalyst. Such a catalyst for purifying the exhaust gas should have a long life, and should not cause deterioration of exhaust gas purification capability with time. Further, the catalyst should not adversely affect the driving performance of an automobile and should not contaminate the oleum used in the manufacturing process. The conventional technique for purifying the exhaust gas was to employ an oxidation catalyst such as a platinum group metal and a noble metal and to bring the exhaust gas into contact with the catalyst to thereby oxidize the hazardous materials contained in the exhaust gas. As a means for increasing the life of a catalyst used in the exhaust gas purification system, a technique is known wherein it is provided with 0298e982ba
