WordStar Command Emulator For Microsoft Word Crack

Version: 1.5 Registered Version 1.5 Installation: Go to the Emulator folder and double click on WordEmulator.reg Open your regedit and add the following three keys: Key: HKEY_CURRENT_USER\Software\SimonTatham\PuTTY\Sessions\WordStar\Emulator Value: INPUT1 - The key doesn't have to be directly under HKEY_CURRENT_USER and you can copy it from one of my existing keys using the registry editor. Value: INPUT2 - Exactly what this says! (INPUT2 = {input1}) Value: INPUT3 - Exactly what this says! (INPUT3 = [INPUT1]) The Program: Go to the WordStar folder and double click on WordStar.msi Run You will see a blue progress bar and you will likely be asked to install a new file. This is just normal Windows installer stuff. When the installer has completed, close all open windows and double click on WordStar.exe You have now installed the Emulator Open a new Word file and choose the Text tab from the ribbon bar Click on the With Command Emulator text box In the drop down menu, choose your favourite keybind (eg Ctrl+Y) Press the keybind and you're off! You can press Esc or click anywhere in the document to exit. This software uses the keyboard only so there is no mouse delay, and if you are a touch typist, it's a great way to save time. Each time you start Word, your auto indent settings are converted, so if you've gone back and forth between the WordStar Emulator and standard Word, you will notice that the indent settings within the WordStar Emulator don't change. More details are available in the Help file.
