Select a product in the list to see information about it (currently selected product: "Coffee, Espresso & Latte"): – Product description – Packaging – Product picture – Add to shopping cart – Purchase with the most convenient ways View Details Shopkeeper is an app dedicated to ecommerce, for a better experience. With Shopkeeper you can manage your whole store from your mobile: orders, manage the payment gateway, the store configuration, the mailer and the security. With Shopkeeper, you'll be able to manage each step of your store from your mobile, thanks to an optimized interface and a very powerful REST API. View Details #AppLift is a augmented reality app built for coffee shops and bars that allows customers to choose their favorite style of coffee from an infinite list of coffee. Customers scan the barcode of the liquid they want and the app will provide them with the list of coffee and roasting style that best match their tastes. With #AppLift you can: – Know your customers and make suggestions – Win over new clients – Make custom filters to get your customers to your coffee – Redirect them towards your best roasting and coffee – Drive sales and increase turnover – Increase productivity and customer satisfaction – Make money The list of coffee drinkers in the UK grew from 14M to 29M in the last 5 years, and is expected to grow to 50M in the next 5 years. At the same time, coffee shops are losing over 2M customers a year, mainly due to the fact that customers see other ways to have a coffee that are cheaper or faster.

What's New in the?

Simply POS is a highly customizable Point of Sale application which easily adapts to the needs of any business. You can offer your customers credit payments through a hyper-secure checkout which has three modes of security: * Secure Mode = Basic security and allows secure credit card transactions * Enhanced Mode = Increased security and add more options for secure credit card transactions * Pro Mode = The most advanced security level with multiple money sign and special characters for stronger credit card security Simply POS is created using a clean modern interface that makes the application incredibly simple and easy to use. With Simply POS, you can easily take care of all your customer transactions: set budgets, set commissions for different salespeople, send letters to your clients, add orders to favorites, create reports and set prices. Simple POS allows you to easily offer discounts for bulk purchases, and offers other enhancements like the ability to print receipts on demand and automatically record changes to the Point of Sale. Simply POS – customers go from the menu to the cashier, and from the cashier to the POS desk, where the summary is printed as a receipt, and provides a summary of the sale to the customer. A receipt for each customer is printed, with all the data entered by the cashier, and can be printed in different colors. The company is a great solution for people with little to no technical experience. Simply POS is a point-of-sale solution that is very light and does not require high-end computers or expensive software. Simply POS: * Easily track orders, clients, payments, cashiers, commissions and salespeople * Highly customizable and multi-lingual application * Designed to be a simple solution for people without knowledge of coding * Send emails to clients and customers * Send notices to your clients, e.g. promotions * Open an application with the scanner directly at the POS desk * Smart, automatic options to print receipts on demand * Intelligent budget tracking * Statistics for your business Simply POS is fast and easy to install, with no technical knowledge needed to set it up. Simply POS is easy to use and can be customized to fit the needs of your business. Simply POS has a powerful library of features: * Customers and their orders * Cashiers and their passwords * Orders to be fulfilled * Commissions to be awarded * Reports * Printer and scanner Simply POS is designed for those companies without an IT department or without the time to keep their computers updated
