---

June 19, 2017 - Street Fighter V didn't perform well, with only 600,000 units sold in the first quarter. They hoped they would sell at least 2...

However, sales eventually exceeded 3 million units.

While Capcom does not disclose the details of its earnings, sales of "Street Fighter V" in its first weeks of release showed that it sold close to two

---

million units, exceeding the sales of any other game released in its first weeks. Street Fighter V was also released on multiple platforms where it was made available for digital download as well as for purchase with real money. During E
