Table of Contents: History AutoCAD History is shown on this page. AutoCAD History 1982-1988: Consumer version published by The Grafakos Group (Bill Delwiche & John Miller) as AutoDraw. Delwiche and Miller created AutoDraw after receiving a request from the partner of a microcomputer company, WBC, who wished to bring AutoCAD to home computer users. The software's graphics displayed the first curve, cube, sphere and cylinder in user-friendly ways. Each of these elements were usable from the keyboard, mouse, light pen or graphics tablet. The software was based on trial and error, and the first version of AutoCAD was called "AutoDraw 1.0". Delwiche and

Miller founded The Grafakos Group (later renamed Grafakos Software), and published a professional version called Grafakos Professional Graphics with a license. 1989-1991: The first version of the professional AutoCAD (for The Grafakos Group) was released in January 1989 as AutoCAD 1.0. 1991-1996: AutoCAD version 1.0 was released for The Grafakos Group. 1996-2000: Two versions of the professional AutoCAD for The Grafakos Group were released: AutoCAD 1.5 (1996) and AutoCAD 1.5a (1997). These were followed by two releases of the enterprise AutoCAD for The Grafakos Group: AutoCAD 2.0 (1998) and AutoCAD 2.5 (1999). AutoCAD was available on CD-ROM and floppy disk. For the first time, the software could be purchased in multiple languages (English, French, Italian, German, Spanish and Portuguese). 1999-2003: AutoCAD 2.0 was released for The Grafakos Group, marking the first time that the software was sold on CD-ROM without a floppy disk, and was released in multiple languages. 2003-2009: In November 2003, the software was rebranded as Autodesk® AutoCAD® and included additional functionality, multiple language support, a multiple monitor GUI and the Autodesk® DWG Converter. 2009-2018: In May 2009, the software was rebranded as Autodesk® AutoCAD® LT (and AutoCAD LT 2015 as the first official

In the beginning, many plugins and applications were developed for AutoCAD Crack For Windows LT, but as AutoCAD Cracked 2022 Latest Version LT was being phased out in favor of AutoCAD, they were re-targeted and created for AutoCAD in addition to the previous products targeted for AutoCAD LT. AutoCAD officially supports the exchange formats discussed above. Additionally, there are formats such as ARX (a file format used by AutoCAD), AI2 (AutoCAD's component interchange file format), and BIML (a proprietary

file format used by BIM 360 degrees). AutoCAD also uses SQL (Structured Query Language) as a query language to access database management systems. File formats There are more than 25 built-in drawing file formats, including: AutoCAD DWG, AutoCAD DXF, AutoCAD PTC, AutoCAD AI2, AutoCAD BIM LAYOUT, AutoCAD Civil 3D DWG, and AutoCAD Civil 3D DXF. There are also numerous third-party add-ons that support import and export of the drawing file formats. The more traditional DWG and DXF files are produced by Autodesk's AutoCAD software. Autodesk also makes AutoCAD DWG or DXF format files available online for download from its website. AutoCAD also supports import of: *.DWG; *.DGN, *.DWF, *.DGN; *.DWL, *.DGN; *.DWP, *.DWM, *.DWG; *.Dxf, *.DWG; *.Dwg; *.dwg; *.dxf; *.dwg; *.svg; *.dwg; *.dgn, *.dwf; *.dwg; *.dwpl, *.dwup; *.dwg; *.igs, *.iges, *.iges; *.ilk; *.asb; *.cdr; *.vtu; *.vtm; *.vtx; *.vcg; *.vmi; *.vmd; *.vrml, *.vmx; *.dwz; *.3dm; *.3dm; *.asc, *.3dm; *.nurbs, *.3dm; *.off; *.stp, *.stz; *.xdr; *.j2s; *.i2s; *.tga; *.dgn; *.dxf, *.dwg a1d647c40b

Individual and community-level influences on fruit and vegetable consumption. In a cross-sectional study of 15- to 16-year-old Australian adolescents, perceived barriers and benefits for fruit and vegetable consumption (FVC) were assessed. The authors used a representative sample of 4864 students to evaluate the influence of individual (eg, knowledge and beliefs) and social environmental (eg, social support and parental attitudes and behaviour) factors on FVC. Socioeconomic status was used to control for possible confounding. Perceived environmental factors were used to develop a latent factor for FVC. A stepwise multiple regression was performed to assess the influence of individual and social factors on the latent construct. Perceived environmental factors and community attitude were independently associated with the latent construct, explaining 30% of the variance. Among individual variables, knowledge and beliefs were related to the latent construct. Among social variables, there was a significant association between parental attitudes and behaviour, parent-child relationship and FVC. Findings indicate that perceived environmental factors and community attitudes have an independent and significant influence on
