What's New In?

Use Hyperball Start Hyperball and open the file you want to scan. Click 'Scan' and then 'Scan File'. Once it is finished scanning the file, you can click 'Close' to leave the program. Now open the Scanner and click 'Create Scan' to create a new scan. Enter the file name you scanned and your email address. Click 'Create Scan' and then 'Start Scan'. If you are the first person to start the scan, it will take a while (depending on the speed of your internet connection) and you will be asked to wait until the scan finishes before it can start sending you results. If you click 'Start Scan' again, it will start a new scan and show you the previous results. ****NOTE:**** If you want to cancel the scan, you can click 'Cancel' in the 'Scan file' section of the Scanner. The same button is also available in the 'Scan status' section. You can also click 'Refresh' to see
