Q: How to import multiple JSON files to Postgres using DataGrip? I have a large number of JSON files to import into a Postgres database. I tried copying each file to a location and using Import utility to import the file contents. This was very slow because the files are large (10-30 mb) and I have 16 GB of memory available on my machine. Is there any way I can import the files using a batch file or something similar? I tried running the script below by using the same location as the source-file and using the same delimiter as the source-file but it didnt work. COPY 'E:\shopping-directory\input\_files' FROM 'source-file' with ( fieldname = 'id', separator = ',', quote = '"', escape = '\ ' ); If it helps, the file is formatted as below: { "id": 10012, "lastName": "Anonymous", "firstName": "P", "lastUpdate": "2018-04-22T01:03:47.712Z", "schoolName": "Stevan", "birthday": "2015-08-29T16:37:57.000Z", "email": "ahm@gmail.com", "couponId": "Coupon-123", "avatar": "", "gender": "M", "followers": 10, "followerId": 10012 } A: I found a solution to my problem. In the postgresql database folder go to postgresql.conf and edit the location of the input-file, which is specified in the input-format field. I used \$PGDATA/input\_files and this worked as expected. Do a quick search on \$PGDATA to learn more about this variable. Q: What are the most vulnerable factors in
