Autodesk developed AutoCAD as a replacement for MicroPro's AutoPlant II program and sold it for \$99 (US). In 1989 Autodesk received a cease-and-desist letter from CP/M over copyright infringement, and had to rename the new product AutoCAD. In a statement, Autodesk CEO Joseph Desatnik claimed to have a degree in architecture, which he said he used to draw buildings with. The legal battle lasted for several months until an out-of-court settlement was reached. In 1990, Autodesk introduced AutoCAD for Windows (AutoCAD Plus, later changed to AutoCAD Light) and renamed the old AutoCAD to AutoCAD Basic. AutoCAD went through many changes, especially between 1994 and 2000. The first release to be available as a Windows NT-based application was AutoCAD LT, which used the same type of technology as AutoCAD for DOS (which was later released under a GPL license), and was a part of the widely available Windows NT operating system. The programming model of AutoCAD was expanded for enhanced automation in the early 1990s, to introduce Visual LISP (Visual Basic), VBA (Visual Basic for Applications) and a scripting language called AutoLISP. While AutoLISP was created to be backward compatible with AutoCAD's original LISP code, the syntax of AutoLISP was almost identical to that of AutoCAD's originally-developed LISP programming language. Visual LISP was originally developed as a sub-set of Visual Basic, and was known as Visual Basic for Applications. The only change made to the Visual Basic language to make it into Visual LISP was 5b5f913d15
