A PBE-grade Raspberry Pi has no space for anything else. If you still intend to install PolyBoard Pro on the board with 100% free space, use one of the following methods: Method 1: Use the official Polyboard Pro software to download the.ipk file and install it directly. Step 1. Download the.ipk file from the Polyboard Pro website, then unzip it. Step 2. Start the Polyboard Pro installation program, and use the SD card you want to use as the source and the SD card for the installation target to set the PolyBoard Pro installation as your default disk. Step 3. It will be prompted to restart your Raspberry Pi. Restart the PolyBoard Pro that is installed on it, the switchboard will be rebooted automatically. Step 4. When the platform is powered on again, you will see the PolyBoard Pro Shell (or GUI, as the case may be) start up, prompting you to select the item you want to use as the default web browser. Step 5. If you want to use Google Chrome to visit Google, set it as the default web browser; if you want to use Firefox to visit Mozilla.org, use it as the default web browser; if you want to use Opera, use it to open your mail client. Step 6. [Optional] If you want to use Google to navigate, you can set Google as your default search engine for the browser to use. Otherwise, you can also set it as the default browser for user-assigned applications, which will keep related settings and configuration saved to your Google account. Package 1: For Windows users. You can use this download link to download and install the Microsoft Windows package. Instructions: Step 1. Install PolyBoard Pro on the computer first. Then the operating system of the PolyBoard Pro platform installed on it can recognize it as a local disk. Step 2. Unzip and run PolyBoard 5 Pro_Win_PBE.exe to download the Windows package. Package 2: Linux users. Instructions: Step 1. Install the use of the same operating system as PolyBoard Pro. You can use the following version from the official website, which is suitable for the most widely used distribution: Debian Stretch (17.1)

How to download and install PolyBoard What is PolyBoard? What is PolyBoard? PolyBoard is an application that allows you to create and have available to you, under the same folder, a 7-inch Android tablet at nominal expense. If you are an Android developer you may wonder: why would I want to make my own tablet? It happens that some devices can be more suitable than others to develop with. You might be surprised to find that in all cases PolyBoard is a good choice. Tablet, in design, development, and browsing, Android offers more or less what one can expect from a tablet. And when it comes to a 7-inch Android device, we offer a model that perfectly fits this description. Android tablets are fragile devices that usually require a case. So a good solution for developing with PolyBoard is to bring a GalaxyTab™ 7.0 (or up) to work at the office. It is a safe way to make your polyboard development device a lot more comfortable to use. However, with such a large screen and a screen that requires an external keyboard, you may prefer to work at home, and that's what PolyBoard is intended for. The features of the Android platform on the mobile phone are not just available as on the new tablet, they are available on what has been called "dumb terminals": many applications are available for these devices that allow you to control many of the devices of your Android phone. Additionally, if you have a smart phone, connecting it to the tablet is easy. Tablet. In design, development, and browsing, Android offers more or less what one can expect from a tablet.
