For the first time, players can switch between the different playing modes during matches and create their own custom game. Here are all of the features being included in FIFA 22: Artificial Intelligence: AI Players react to every movement the player makes and try to win the ball back themselves, creating unpredictable and dynamic rival AI. The AI also performs at its best in the more complex rules. Realistic Controls: Attack, defense, goalkeepers and shooting improvements improve realism and accuracy. FIFA 22 features Pro-Specs, which provide more control, feel and feedback when players perform high-intensity moves and shots. Replay: Create and edit replays directly from the Match Day view. New Passes and Tackles: Real-life players perform actions on the ball, allowing you to assign the best pass or tackle to every player. Brand New Player Game Engine: FIFA 22 introduces the most complete and advanced player game engine in any console FIFA game. Players gain and retain possession faster, use new shooting techniques, have to be more aware of the ball, and perform dribbling sequences, including new Ball Controls and close-range passes. Real-time Tactical Game: FIFA 22 features improved tactics and Decision Making, which lets you change your approach by selecting your best XI from all over the pitch and giving instructions to the players in real-time. Custom Games: Want to create your own tournaments? Custom Matches are game types and difficulty levels created using complete team and player data from player kits, team kits, and player contracts. Accurate Physics: The ball reacts to the player's actions, the pitch conditions (grass, no grass, dry or frozen) and its environment in way that FIFA 21 never did. Defenders react to the ball and attackers react to defenders and defenders. The FIFA Ultimate Team series has been one of the biggest franchise success stories in gaming. The FIFA Ultimate Team series allows players to download FIFA games, then earn packs and kits for real-world players. These packs and kits can then be used to build and customize their own virtual soccer player. FIFA has evolved every year, with new advancements in graphics, gameplay, and presentation. Previous versions of the FIFA series have also been used as a testbed for new features and techniques in larger products, like the NBA 2K series and Madden NFL series. FIFA Ultimate Team is getting a major update in EA Sports' upcoming major release, with
