The main application in tsElements for SolidWorks is a utility that allows you to transform NURBS surfaces into SolidWorks mesh surfaces. After they are converted to surfaces or solids, it's possible to texturize the surfaces. tsElements for SolidWorks can also be used to import models created in other applications such as Maya, 3ds max, Zbrush or modo into SolidWorks. In this case, the model is imported to SolidWorks and then exported to SolidWorks, as a SolidWorks component. It is possible to create a surface or a solids from the model, by using tsElements for SolidWorks. tsElements for SolidWorks is a useful plug-in that was especially designed to help you import models, create fluid designs and add intricate details to the models you create. This plug-in is able to handle models designed in OBJ format by applications like Maya, 3ds max, Zbrush or modo. After the selection process, it is possible to: - create a number of duplicate objects - select elements from specific parts or different parts of the model - select a model to have the geometry erased - mark surfaces for the selection of only those surfaces that are open - select the required topology: - solid - surface - non-standard, that is, cave and recess geometry - non-standard, that is, surface cavities and texture channels - compound surfaces After that, it is possible to: - create a new solid or surface from the selected mesh - change the topology of the solid or surface - add attributes to the surface or the solid - parametrize the surface using a B-spline - apply a custom hat to the surface - texture the surfaces with the selected pattern - change the length of the hat - change the height and the angle of the hat After conversion, it's also possible to edit the surface or the solid. There are two commands that can be used for this: trim and filter. Trimming changes the thickness of the surface. Filtering filters the outer geometric surfaces. One of the main advantages of tsElements for SolidWorks is that it is able to export the models created with this application to.STL,.
