- range of positions, making it easier to isolate which minor details they need to improve on
 - Overthrow (tactical positioning) □ The development team has increased the size and weight of the ball to allow players to better utilise every touch on the pitch. Players can properly control the ball in the air and more reliably score from distance. For more information on this feature, keep an eye on the “Player Impact” section of this press release.

 - New Features □ The new features in FIFA 22 include Distance Control, Squad Tactics Fouls, Staccato, Free Kicks/Penalty Kicks, and Set Pieces.
 - new camera settings □ Matchday, Follow Focus, Player Interactions, and Post-Match Add-ons offer more personalised camera angles. You can also choose the camera views, such as the First Man, Crew Shield, and Pre Injured.
 - Ball Fly & Force □ Powerful shots such as headers, crosses, and one-time efforts are all impacted by the Power Of The Shot. New tricks such as a rebound, a roller, a second striker, and the Knockdown Shot are all possible when the Power Of The Shot is released.

Creating more open and exciting league systems is our focus and so we've included the new second-tier licence type for teams as well as the new third-tier licence type for players that make them more role-based. We've also integrated the release of ratings from PES 2014 to allow you to more easily progress through leagues and manage your players.
