New Default AI New Goalkeeper New Player Vision Sightings System Traits with which gamers can personalise their player experience include various anthropomorphic elements and unique abilities such as propelling the ball with the feet or even firing a starting line up of gunfire. A new trait system creates a wide variety of both real and fictional player traits. While there will be 50 different traits at launch, customisation options will be continuously expanded in future content updates. Find out more about traits and how you can personalise your player in the FIFA 22 Trait Analysis Video. Player Behavior FIFA Ultimate Team The ability to now sell and trade both players and packs will enable an unprecedented level of control. As well as being a favourite pastime, players also have a direct impact on the gameplay of FIFA Ultimate Team (FUT) including their ability to build a team, personalise kits, score spectacular goals, make an incredible impact on games and the performance of their teammates. For more information on what we

can expect from the FUT trading and selling system, head to our FIFA Ultimate Team Development Video New FIFA 22 introduces “HyperMotion Technology,” which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. This ground-breaking technology has the potential to create realistic, lifelike environments. In addition, a new default AI, Goalkeeper and a new Player Vision Sightings System ensures that players’ movements are more true to life. Features Key:

- Full Season Technology
Full Season Technology: For the first time in FIFA’s history, every player and club feature real-world qualities, stats, over 700 overall team and player ratings, team kits, and much more. Double the number of players available to create a new dimension of gameplay by taking advantage of improvements in player attributes, bringing over 1,100 players to life.
- FIFA 17-style dribbling system
Dribbling system: Real-world dribbling controls allow players to take on opponents with advanced passing techniques that perform like the ultra-smooth ball control of sumo

wrestler's mastery of the ball with just one arm. An on-field representation of this specific play style is woven into all of FIFA's true-to-life pitch markers and defensive positioning. FIFA's addition of the "kissing hands" technique allows for more advanced move-makers to excel at throwing crosses, volleys, and lobs over defenders.

- **New match experience**

More features: More options to create the ultimate match, including dynamic weather, night matches, and fireworks. The new system also includes new FUT Club Pages, and clubs will now be able to bring in hulking big names in their own squad. And to unlock the set pieces on the new artificial turf using FIFA 17's new second touch, players simply need to score a goal or an assist in the match.

What's new in Fifa 22:

- **Pro Evolution Soccer 2018 remastered with new Pro Evo Career Mode.**
- **Player 3D - play as yourself as a player and learn from your past. Most importantly, be a better player when you reappear in Matchday Mode for your next match.**
- **HyperMotion - Powered by your movements. The world's most authentic real-life movement captured in-engine, with no game pads or sensors.**
- **The World Cup is back. Play as 32 of the world's best nations, as they compete at the 2018 FIFA World Cup Russia™ from June 14th-15th.**
- **One referee ruling one call. With the same officiating team as on the 2018 FIFA World Cup, you can sit back and focus on the action.**
- **New regional kits. In FIFA 22 there is no longer a distinction between nations or regions. EA has added a new rating system for team kits. Half of the 32 teams will have an iconic national flag on their jerseys, with a full stitched team kit provided for the rest.**
