If you're used to working on your computer but also need to access it from a remote location, you're probably no stranger to the whole remote desktop connection concept and are familiar with Windows' default tool. However, if you truly are familiar with it, you might understand that what it offers you is subjected to certain limitations such as setting custom resolutions or previewing them. Columbus Remote Desktop Portable Cracked Accounts is one of the apps that can provide you with these features. Connect to a remote Windows machine As stated above and as its name strongly suggests, Columbus Remote Desktop Portable Activation Code is a software solution that was designed to help you connect to another computer remotely. Aside from doing what the default Windows Remote Desktop tool is capable of, this application also enables you to customize the way you connect by featuring a custom resolution setting that can be enforced the next time you try reaching your host. More so, it makes use of your GPU in order to boost the speed of the operations. Portable application Given the fact that it is portable, this program doesn't require you to install it on the target PC. Instead, you only need to unpack the archive it comes in and launch the executable. This also means that you can run it from removable storage media such as USB flash drives or external HDDs or SSDs. More so, you don't need to worry about it generating extra files or folders on your computer or tampering with your Windows registry entries. Simple remote connection tool with customizable resolution All in all, if you're looking for an application that can help you connect to a remote computer in a quick and effective manner, you can count on Columbus Remote Desktop Portable. b7e8fdf5c8

Designed to work seamlessly with Windows XP, Vista and Windows 7, Viewer absolutely allows you to share your screen with anyone with a connection to the Internet. All you need is access to the internet and a web browser. It also offers video as well as audio conferencing and screen share capabilities. Unlike applications that use Webcam or microphone data to get screen sharing capabilities, Viewer scours the internet for a video stream, images or written content. It then analyses it and presents only the relevant information to your viewers or collaborators. Viewer works with Internet Explorer 7 and higher as well as Firefox or Chrome. It does not require any special plugins and can be used from any platform. It operates in stealth mode so that you don't need to be watching for activity on your display. Simply download the free Viewer, make sure your system is connected to the Internet and start sharing with the world. You can download the free download Viewer at: Description: Server2Go is a remote desktop app that allows you to access your computers remotely.
