We recommend trying the registered version of Dcam Server 2.0.3.0! It can and will drive our hardware all of the way up to 100 Mbps and add 100 extra hours of recording to our recording times. There is more real time compression applied to our recordings so your computer won't have to work as hard to compress the data. We recommend trying the registered version of Dcam Server 2.0.3.0! It is perfect for those without the latest and greatest devices as well as current or future HDCP 2.2 enabled devices (newer Sony PS3s, Xbox 360s, etc). Your files will be available on both the network and direct from the device.
