Motion capture data are input to the engine (in a process called 'pushing'), with the engine using the same physics engine that drives real-world movements to animate players in-game. Players' movement characteristics, such as acceleration, speed, change of direction, etc., are converted to the terms and conditions of a real-world match. [Related: FIFA 21 review] The introduction of motion capture technology to FIFA 22 has provided developers with data that has not been used in any previous game. The data used to create real-life game physics have enabled physics and animation teams to work on individual gameplay elements, such as acceleration when touching the ball, interaction between players and passing techniques. This video provides an overview of the motion capture technology in FIFA 22 and how it enables developers to create gameplay elements that are true to real-life football. [Related: FIFA 21 review] I could cry. FIFA has been one of the most critical pieces of software I have owned over the past few years and this makes me love it even more. FIFA 21 is a huge step in a number of areas, but most importantly, it is the first time that EA truly makes it's engine the core of the gameplay. Yes, FIFA being the most popular football game on any platform is what drives this game and on one side of the equation there is FIFA and on the other side of the equation is the engine. You could feel it immediately during the intro video with the funny jokes and the focus on the football being paramount rather than the graphical presentation. The gameplay has been significantly overhauled and for the most part, I think EA have kept it mostly intact from what we saw last year. I haven't played it, I'm sure that it is extremely detailed and has some amazing features, but for me, I feel that I would be able to assess this much better after playing it, but lets just say that there are a few tweaks to goalkeepers that I like and I'm sure that there are some amazing ideas to improve the gameplay. But mostly, I think that FIFA 21 has a high chance of winning an award as the best Football Game and that is mostly due to the engine that is driving the game. Now for my review. First of all, you have the teams in FIFA 21, they are all looking great and the seasons that you play in has also been dramatically changed, once again making the game seem so

Liverpool Football Club is delighted to announce the signing of Naby Keita from RB Leipzig. The 23-year-old midfielder, arrives at Anfield after his move was completed by mutual consent and will join up with the first team squad for the start of pre-season training. Keita has made a total of 92 appearances in the Bundesliga to date, scoring 11 goals and providing 21 assists. Naby Keita 22 : Keita began his professional career with hometown club OGC Nice, where he made his first team debut as a 16-year-old in 2009. He was rewarded with a two-year loan deal with Serie B club Catania in 2011, where he quickly established himself as a first-team regular and finished the season as top scorer, before returning to Nice to be part of the side which won the 2012/13 Coupe de la Ligue. In 2015, he moved to RB Leipzig, joining up with another friendly local, ex-Reds German international Mladen Petric. With Leipzig, he scored three goals and provided five assists in 40 appearances, before being named the 2016 Bundesliga Player of the Year. Keita moved to RB Leipzig's Bundesliga rivals RB Salzburg for the 2016/17 season, before being offered a contract with the reigning Bundesliga champions, RB Leipzig, in May 2017. This summer, Keita has agreed a deal with his new club to join up with the squad for pre-season training as he prepares to make his debut for the Reds. Head Coach Jürgen Klopp said: "I am absolutely delighted to welcome Naby to Liverpool Football Club. "He is a player who has been tracked by a number of clubs but his contract situation meant there was no way we could sign him unless we were guaranteed we

FIFA (Football, Action, Fantasy, Genre) is the #1 soccer franchise in the world. It has sold over 75 million copies, spawning a video game mode in NBA 2K, a new genre of action-adventure games in the THQ franchises, and a massively multiplayer online game. This year, the FIFA series takes on the world by releasing the first official licensed professional sports game. Read on for a sneak peek at some of the most exciting features in FIFA 22. FIFA Personality Mode Star Wars, Mario, The Simpsons, and even Halo had their fantasy characters. Now, the sport you love can have its very own characters. Over 750 player appearances are coming to FIFA. These new faces will let you know who plays where and why. Create your own unique teams, play as superstars of the past, and be the hero of the future. You'll even get to choose how the game looks. Want your team to play more mechanically accurate or you need to see more of the ball? Change your view to suit your tastes. Action Sports Soccer fans now have the tools to switch to the new Action Camera mode in-game. Choose your battles and your styles in a more visually intense way with the ability to rewind shots and speed up the game. You also will be able to unlock new Action features including Speed-Up & Rewind, Heroic Shot, and Undo Shot. Quickly impact your opponent with take-on crosses, balance your play by using attacking offsides, and throw-in soccer to double your advantage. You'll even be able to hover above the ball to see what it will do before you take a shot. #CaptainVillassey As the Captain of your favorite team, you'll build your squad, sign new players and tune up your team with updates to the game's player, staff, and equipment systems. EA SPORTS Wizardry Take charge of your players in the most authentic draft mode in sports history. Pick your starting 11, select the formation, and see your team grow. Then, step into the shoes of a coach and take your team's development even further with adjustments to your training and tactics. There are six game modes to choose from in FIFA 22. Local play allows you to compete with your friends in one-on-one
