In 2002, the game was retitled KOF 2002: Unlimited Match.Q:

Does anyone know of an elegant way to multiply the content of two lists? Say I have the following lists: list1 = {{1, 2}, {3, 4}}; list2 = {{5}, {5}}; Assuming that a and b are known constants, and I want list1 \* list2 to give the result {{a, 2\*b}, {3\*b}, {5, 5\*a}} I could do: list3 = {{1, 2\*b}, {3, 3\*b}, {5, 5\*a}}; Cases[list3, {\_, \_, \_}] However, it seems like there should be a more elegant way to do this. Any ideas? A: list1 = {{1, 2}, {3, 4}}; list2 = {{5}, {5}}; (\* list3 = {{a, 2 b}, {3 a}, {5, 5 a}} \*) list3 = {list1, list2} //Transpose // Apply[Times] (\* {{a, 2 b}, {3 a}, {5, 5 a}} \*) Or one can use a pattern match: {Plus @@ #1, \_, Plus @@ #2} & @@@ list1\*list2 // Chop {{a, 2 b}, {3 a}, {5, 5 a}} A: I would not use Transpose but use only apply: apply[times\_] := Module[{res, t}, res = times t; res /; Head[res] === Times && Length[res] == 2 Length[t]] mylist = {{1, 2}, {3, 4}}; apply[times] @@ list1\*list2 (\* {a, 2 b, 3 a, 5, 5 a} \*) 648931e174

I was just testing out of curiosity how long it would take my MacBook Pro's iMovie 11 to import 10 minutes of edited video footage. It was taking an inordinate amount of time (weeks, not just minutes), so I killed the app and tried again. I was surprised to be greeted by this message: "iMovie 'X' is not a valid command. Try running 'iMovie --help' for usage. Try 'iMovie --help-commands' for more info. " If anybody has any idea as to what this means, I'd appreciate it. A: I think the reason why it happened was that the app couldn't find an external drive hooked up to my MacBook. In the end, I got to the required footage and was able to import it just fine. A:
