It's an element that can improve gameplay and make for a more authentic experience. HyperMotion technology provides new animations and behaviors for players. For example, players who spin off balls into the area will now be treated as if they released the ball too early, losing the control and leading to a launch that is more unpredictable. This has been done to encourage more goal-scoring and promote attacking play. Players will have more choices on the pitch and will have more ways of going about winning the ball. FIFA 20 introduced "The Journey", a new career mode in which players can explore and enjoy the route to the pinnacle of the game. The Journey rewards your progression with new footballing challenges and rewards, as well as new team-based activities. FIFA 20 added a new "Ultimate Team" mode, which builds upon The Journey to unlock player attributes and styles. It allows players to play matches using soccer legends and from different countries. It's now possible to create superstar players and tailor your Ultimate Team to match your team mentality. You can now earn coins to spend on transferring players through goals, tackles, headers and other highlights. There are also items you can buy such as Off-The-Ball Control and Final Pass Control. FIFA 20's "The Journey" World Tour and "The Journey Ultimate Team" mode saw increased player and coach interaction. Players can now show their admiration for individual skill or passion for the club and look at

different modes of play that will benefit them. They can also develop relationships with their teammates, learn about their culture and make new friends. FIFA 20 introduced more FIFA Ultimate Team cards and new player packs. There are a total of 25 cards, including seven FIFA 20 themed ones. Players can have up to 12 players on their Ultimate Team, while the rest of the team can be customised. The EA SPORTS ID allows you to play with your friends online, like what you already know from online play. All you need is a network address and a game disc. For players who don't want to play with people online, they can now create a Draft Pick format and customize the group that they're playing with. For starters, you can set up your preferred game mode, and change your team formation and formation style.

The horror of the World Bank is still with us, as we remembered the death of someone we truly loved with the passing of his wife, Lyudmila. 12K Readers, I have a confession to make. I was asked to write this piece. I was all set to write about the World Bank and what should be done to fix it. Perhaps some of you might have heard, but the Wants Report was launched last night on CNBC. It's the bad boy of international development – a sort of in-depth financial analysis of the World Bank, the IMF and the SDGs. First I thought that I really must dig into the report and find something positive in it. I read it with a journalistic eye. I compared it to other reports, I've written about, I've worked on, I've read to see if it had anything more valuable, good or clear than what I was writing about. But I couldn't find anything useful to share. And I don't want to patronise the report by saying that they're not writers. They took on some big issue and wrote a fairly straightforward financial analysis of it. And the report did make some points that I agree with. But I can't find anything new. Nothing that could justify the kind of anger that was sparked across the world on Monday and Tuesday. So I am left reflecting on how it was possible to let these words be written that so many people found repulsive. Here are the words. "At the global level, by tracking government
