The Sultanate of Oman's long-time ruler Sultan Qaboos has died at the age of 78. The death was announced by the Omani Information Ministry on Saturday. "The Sultan's health has suffered due to a prolonged illness and, at 11:53pm GMT (1:53pm Oman time), it became impossible for him to recover," the statement said. "The Omani people live for his royal virtues,

humanity and love for the country. He will be deeply missed." The sultan's death comes after a life of extraordinary personal sacrifice as well as commitment to the country's sovereignty and security. **READ MORE:** Oman news in pictures - Sultana Zaghoul The statement said Sultan Qaboos had become world-renowned for his embrace of reform, leading his country into the modern world while following its

traditions, heritage and diversity. Muscat was also the birthplace of the sultan's father, Said bin Taimur, who was himself the first sultan of Oman, having seized the throne in 1970. He was also a Muslim Brotherhood supporter and was seen as a moderate in comparison to his predecessor, his half-brother, Sultan bin Saif, who was the country's most controversial ruler. As a young officer, he was imprisoned for his political activities in the 1950s. After seizing power in 1970, he was at first viewed with suspicion and hostility by the older establishment in the

military and government, despite having won the hearts of the young educated middle classes. Sultan Qaboos has won praise around the world for his country's education and healthcare, pioneering moves to protect women and the environment and for embracing a more open approach to the outside world. As ruler, he was the first Arab leader to visit Israel in 1985, the first sultan of Oman to go to Germany in 1988 and the

grade blockchains like R3 and others. The consumer-grade blockchains today are expensive to build and don't scale well. However, the technology that underpinning the blockchains still the same, only with an authentication and consensus layer of the chain.
