First Look: FIFA 22 launches today on all platforms, with the PC version releasing tomorrow, February 1st, on Origin and EA Access. This PC version of the game will include features exclusive to the PC, including an all-new Pro Mode and the ability to play online and offline with all players on the same team simultaneously. Check out the gameplay video below to learn more: The PC version of FIFA 22 will use the 2K and Frostbite game engines. First up is the Frostbite engine, which is the engine widely used in Battlefield and Need for Speed. Frostbite was used to render the environments in the E3 2019 gameplay demonstration. In addition to the Frostbite game engine, the PC version of FIFA 22 will include: New AI system New Passing system Improved goalkeepers Brand new offensive system Pro Mode Player Boosts We'll go over the game engine below and then dive into gameplay improvements. FIFA 22 EA SPORTS Game Engine FIFA 22 has a brand new game engine: the Frostbite engine. The Frostbite engine has powered games such as Battlefield 5, Need for Speed, and FIFA titles from the last generation all the way to FIFA 19. The Frostbite engine makes it easy to make the game look and feel like the real deal, since it does a pretty good job of recreating real-life physics, and it creates a realistic atmosphere. While there is a good variety of in-game assets and objects, it doesn't quite reach the level of AAA titles that you see in the market. However, it's a nice-looking engine that is great for sports titles, and is even used in other EA SPORTS titles, such as the Madden series. In FIFA 22, everything on the Frostbite engine has been rebuilt or improved on. Some of the details in the game are still a bit blurry, but they do a great job at getting you immersed in the game. FIFA 22 has a wide array of gameplay features and performance improvements in this new iteration. For the first time in a FIFA title, the AI system has been completely rebuilt and reworked. The AI is capable of using tactics, such as a high press, to counter your game plan. The AI players will try to take advantage of situations on the pitch, such as scoring opportunities or defending a penalty

### Fifa 22 Features Key:

- Play as any Pro, Legend or Icon you want. Signing new players will unlock new squad variations and kits to customize your teams uniform exactly to your preferences, allowing you to create a team entirely tailored to your style.
- Up to 50 million new animations, creating huge game environments.
- New variation of Small-Sided Leagues that gives you more gameplay.
- New FUT Black card sets. (We have to test and validate the cards)
- Career Mode - Live out your dreams as both a manager and a player. Start as a player in FUT and then become a manager and take on the role of the chief executive of your own soccer club.
- Intuitive new game design. You're never more than 10 meters away from your next action.
- Infinity Engine, a revolutionary new engine that creates photorealistic visuals anywhere on the field, including player models, kits, and stadiums, plus new detailed players, gloved hands, and gold-plated boots.
- Many more. We'll give you more details closer to release.

### Fifa 22 [March-2022]

FIFA is a product of Electronic Arts and has been a worldwide success since its launch in 1990 on the original SEGA Mega Drive™. It's the best-selling sports video game series ever, with more than 250 million copies sold across different hardware platforms. FIFA is the only sports game with official licenses to the UEFA Champions League™, UEFA Europa League™, UEFA Super Cup™, UEFA International Champions Cup™, UEFA Super Cup™, UEFA Nations League™, UEFA Youth League™, FIFA World Cup™, FIFA Confederations Cup™, FIFA U-17 World Cup™ and FIFA U-20 World Cup™. In 2018, an incredible edition to FIFA will return with new ways to play, bring fans closer to the game, and develop a deeper connection with the gameplay. Developing a great soccer game requires balance and a focus on the right gameplay and graphics at the right time, and FIFA 22 answers this challenge with a series of fundamental game changes which are put through a series of rigorous tests. What's new? With FIFA 20, the new Frostbite engine powers a number of gameplay updates including a revamped dribbling system, much deeper emotional relationship with your club, a number of game-changing new features, with more on the way. FIFA 22 builds on the momentum of FIFA 20 to deliver the best possible football experience in the game. New dribbling system – Dribbling is a game changing feature in FIFA but it often went unnoticed due to the complexity of the mechanic. Driven by the Frostbite engine, FIFA 22 delivers the most authentic dribbling ever in the game by giving you complete control. In order to revolutionise the dribbling system we have completely rebuilt the way we control your player, and now this new process has been reduced to a few key inputs. Dribbling is now treated as a player input, giving you much more control and precision when dribbling the ball. New Player Personality – Each player has their own unique personality that's tailor-made for their style of play. Players have increased ball carrying ability and this helps unlock a rich set of personality traits. New Player Animation – The new animation system in FIFA 22 matches what real players do, giving a more fluid experience as your players perform more realistic animations. Every clip has its own unique foot movement and animation, giving every movement its own weight and feeling. Uncovered Pass - The uncovered pass in FIFA is a bc9d6d6daa
