New technology in the technology age is undoubtedly more imaginative and intrusive than any products of the 19th century, apart from perhaps patents. Add to this a newly competitive world economy and the resulting fear of ‘competition’ and you have the perfect conditions for a global struggle for technological dominance. By definition, big data is now a critical part of the information society, and according to some estimates may overtake storage media such as memory, disks and magnetic tape by the end of the decade. EA SPORTS FIFA 22 delivers football for millions of fans around the world with deep gameplay and immersive visuals. FIFA is the

world's most popular and authentic football simulation. Its renowned authenticity, intensity, and agility generate excitement at home, on the road, or online. FIFA is a proven platform for EA SPORTS FIFA to grow year after year. What is FIFA 22? FIFA 22 will release in Fall 2013. Look for new and improved gameplay features, gameplay refinements, and a refreshed user interface at launch. FIFA 22 will bring together a range of new innovations and strategic gameplay features to give players an edge on the pitch. FIFA is a proven platform for EA SPORTS to grow year after year. Why does EA SPORTS say FIFA 22 is powered by Football™? The use of the word "Football" in EA SPORTS FIFA 22 is intended to continue the heritage of the brand's football simulation heritage that started in 1994. The word "Football" has no association with FIFA Ultimate Team, FIFA Mobile or FIFA Ultimate Soccer. The franchise is not turning its back on its heritage and will continue to be known as FIFA. What are the improvements to gameplay in FIFA 22? FIFA 22 will be the most significant release of the

year with significant new features and improved gameplay. Gameplay FIFA Ultimate Team FIFA Ultimate Team has always been an integral part of FIFA Ultimate Team. In FIFA 22, we've developed an improved and upgraded Ultimate Team that more easily balances a player's attributes. For example, we've added attributes that impact stamina and acceleration to make it easier for players to see the positive and negative sides of the change. In real life, when a player is tired, his acceleration drops. This leads to more missed opportunities and poor decisions. To make a player more flexible in their game, we've added attributes that will either give players more energy, or help them manage fatigue when fatigue kicks in. Team Battles Team Battles have always been the core of FIFA Ultimate Team. They give players the opportunity to lock in a lineup and set their strategy. In FIFA 22, we're making several refinements that will make Team Battles even more dynamic and fun. First, you'll now be able to lock in up to three lineup changes in a row. This gives you the ability to balance

depth, or depth and speed.
