The specific aims of the proposed research are: (1) to characterize the physiological role of cytochrome P-450 in several areas, (2) to elucidate the mechanism of interaction of drug-metabolizing enzymes and their substrate molecules, (3) to elucidate the nature of the interaction of P-450-metabolizing enzymes with serum lipids, (4) to isolate and characterize a metabolic product of hemeprotein which is involved in metabolism of phenobarbital, (5) to obtain an improved understanding of the molecular mechanism of interaction of substrate molecules with cytochrome P-450 and (6) to identify the nature of the regulation of cytochrome P-450 levels in mammalian tissues. The proposed research will be accomplished using the techniques of in vitro enzymatic, protein, immunochemical and electron microscopic methods.Louise, I'm checking with Vanessa Parks right now to find out if she has talked to Mark Tawney lately.
