EraseTemp is a free tool to help you remove temporary files from your PC. It can not only help you delete a lot of items from your computer, but also give you a view on these items. You can see on your computer's desktop the files that were deleted in the past and the items that have been removed from the Recycle Bin. You can delete several files in one operation and EraseTemp will ask the user in confirmation whether she really wants to do that. EraseTemp Features: When a file or folder is being deleted, EraseTemp will ask the user in confirmation whether she really wants to do that. If this is a temporary or archive file and it's been opened, EraseTemp won't delete it. Instead, its content will be saved to the Recycle Bin, as it is recommended not to erase files which are opened. If the user clicks the 'Yes' button, the file will be deleted in a few seconds (if the file belongs to the Recycle Bin, it will appear in the Recycle Bin in a few seconds). If the user clicks the 'No' button,

EraseTemp will open a confirmation window (with a progress bar), where the user can click 'Cancel' or 'Restore' the item. The 'Cancel' button cancels the operation, while the 'Restore' button restores the item to the Recycle Bin. EraseTemp will continue to count the files or folders that have been deleted until a specific time is reached (daily, weekly, etc.). The user can change the time on the 'Options' screen. The program shows a log for its operations. This log is saved in a.txt file and you can open it later (see the Program Files or the program's 'Help' menu). EraseTemp will show you what file or folder it is doing. You can click on a specific file or folder and it's icon will be displayed in the Log box. EraseTemp can be used as a portable application, due to its *.exe file format. Once the application is downloaded, it can be executed in all Windows versions from Windows 3.1 to Windows 7 (32-bit and 64-bit). You don't need to install EraseTemp. The files are stored in the program folder (after installing the software). The program was tested on Windows 7 in Portuguese, Polish, Russian, Ukrainian, Italian and French. In my job, I'm often caught in my own head: I think about writing, training, and focusing on effective programs. I can get so lost in what I'm doing, I forget to eat. And I often do get to the point where I'm so tired, I can barely stand. The only thing that keeps me going: realizing that my health matters as much as my career. When I can't do my job well, my clients are less likely to come back to me when they need me. And that makes me unhappy. Staying healthy is a constant struggle for me. I'm constantly tempted to skip out on breakfast, grab a snack instead, and skip the gym — but at the end of the day, I need the energy. I can't work effectively when I'm tired, or feel uncomfortable or discouraged. I've tried to make small changes to
