superclass; @end Q: Find and replace with columns in R I am having some trouble with some code in R. I am trying to find and replace values that are present in different columns but can't figure out the code for it. For example, lets say I have the following dataframe (x):

A	B	C	D	E	F	G	1	1	2	3	0	0	1	2
2	1	2	3	2	2	1	1	3	1	2	3	1	1	1
2	4	1	2	2	1	1	2	1	5	2	2	3	1	2
2	1	2	2	1										

and I want to change values in columns that are less than 2 to 1, and

14 Jan Chili Con Carnage is a game in the glory days of the PS2 and is one of my favorite games when I was growing up. When the game was brought to the Wii as a download, I jumped at the chance. However the download is not available from the Wii Menu. Why not?Q: Hadoop dfs -export: java.io.IOException: java.io.IOException: No filehandle available I have a data.txt file in my HDFS. I am running this command: \$ hadoop dfs -export -m test1 ch_file_output1 data.txt on the hdfs console; and this works fine. The exported file looks like this: part-r-000983-3f3dff7f-fb026e02-073a-4d29-b3f3-4e7cd70a2bf2.gz part-r-001232-34f9ba62-ced2a4f-8b2e-434a-9c41-a0b046625efd.gz part-r-001860-12de3

a24-9596653-3a44-4988-bd35-6e75efb3a7f2.gz But when I run the export command from a java program, I get this error:

```
java.io.IOException: java.io.IOException: No filehandle available at org.apache.hadoop.fs.RawLocalFileSystem.create(RawLocalFileSystem.java:415) at org.apache.hadoop.fs.RawLocalFileSystem.create(RawLocalFileSystem.java:399) at org.apache.hadoop.fs.RawLocalFileSystem.create(RawLocalFileSystem.java:370) at org.apache.hadoop.fs.FileSystem.create(FileSystem.java:162) at org.apache.hadoop.fs.FileSystem.create(FileSystem.java:154) at org.apache.hadoop.fs.FileSystem.create(FileSystem.java:153) at java.nio.file.
```
