"Play Games Online". Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. The platform is known for its realistic user interface, with users able to simulate three-dimensional gaming environments with an interactive "pick-up-and-play" style of game play. Roblox allows a relatively unique form of user-driven game design by displaying the game code live within the game, allowing users to view their game at any time before release. Roblox is used as a learning tool in many schools and universities, as it allows students to learn about programming and digital game development. Roblox Description: "Play Games Online".
