ISO/IEC 27701 Certification: The Global Standard for Data Privacy

We live in a digital world where everything is online. We shop, chat, work, and even learn online. We use online shopping apps or other platforms that require us to sign up, where we share our personal information, such as our name, phone number, email, and location. We don't think too much about entering our personal information into it.

We just used the platforms and the internet, but here is an important question: where does our data go? Who sees it? Is it safe? Because once we share our personal information, it starts moving from one company to another company, and sometimes it moves to a third party that we did not know about. The more the data spreads, the greater the risk increases. That's why ISO/IEC27701 Certification comes here. It helps companies to manage personal information carefully.

What is ISO/IEC27701 Certification?

ISO/IEC27701 is an international standard for a privacy information management system. It is a privacy extension of ISO/IEC27701. It helps businesses to protect their partners' or customers' personal information. It provides guidelines to companies to handle personal information properly while storing, collecting, and processing it.

Why is ISO/IEC27701 Important?

ISO/IEC27701 is important because everyone cares about their personal information. Nobody wants their personal information to fall into the wrong hands. That's why

ISO/IEC27701 Certification helps businesses to protect their customers' or partners' information. This standard follows the privacy laws like GDPR, DPDP Act. It also builds trust and boosts reputation.

Benefits of ISO/ IEC 27701 Certification

- It builds trust among partners and customers by showing them that their personal information they share with us, is secure and protected.
- It helps you to follow the data privacy laws.
- Reduce the risks of data breaches and misuse
- It builds a strong and trustworthy reputation
- It Gives You a Competitive Edge

Which industry needs ISO/IEC27701 Certification?

- Banks and financial companies
- Hospitals and clinics
- IT companies
- Schools and universities
- Online stores

How is it different from ISO/IEC27001?

ISO/IEC 27001 and ISO/IEC 27701 are both ISO Standards that protect information. But they protect different information. ISO/IEC 27001 protects all kinds of information, and ISO/IEC 27701 protects only personal data. It helps the organization to handle Personally Identifiable Information (PII) and make sure they follow privacy laws like GDPR, DPDP, and CCPA. By protecting the personal data, you can build trust among partners and customers.

Why choose us?

If you want to protect the personal information with iso standards, then you are in the right place. SQC Certification provides various ISO Standards like iso 9001, 27001, 14001, 45001, and others. We know that everyone wants to protect their personal information. Our experienced team helps you in each step to achieve your iso certification. With our help, you can easily protect your personal information and build trust, and boost your company's reputation in the competitive market.

Our Services
